GUNNEBO®

Bike racks

Increased usability of a public space, plus another alternative to security

Bike lockers

Secure location for bike storage whilst acting as a physical barrier

Wheel stops

Flexibility in securing outdoor spaces for temporary reasons such as an event

Concrete planters

Incorporating security with an environmental element

Guardhouse

Rated or non rated secure houses available to suit your security needs

Turnstiles

Protect your site entrances to ensure only authorised people gain access

Gates

Simple way to keep unwanted vehicles from entering a zone

In a world where security threats are ever-evolving, the need for robust and adaptable protection measures is paramount. Traditional rated hostile vehicle mitigation solutions are ideal, however can be supported with lower-lying solutions to enhance the overall security posture. This is where non-rated hostile vehicle mitigation solutions are introduced. Non-rated hostile vehicle mitigation solutions are an innovative alternative designed to offer efficient, flexible, and cost-effective protection without compromising on safety.

Gunnebo offer a range of non-rated hostile vehicle mitigation solutions, designed to act as visual deterrents, manage traffic / people flow, create more versatile outdoor spaces and incorporate different styles of security. Unlike their rated

counterparts, these solutions offer a unique blend of adaptability and practicality, making them suitable for a wide range of environments and applications. From council parks to sporting stadiums, these products provide a scalable approach to security that can be customized to meet specific needs while staying within budgetary constraints.

Whether you're a security professional seeking innovative approaches or an organization exploring new options for safeguarding your assets, this catalogue is designed to guide you through the advantages of integrating non-rated hostile vehicle mitigation solutions into your security strategy.

Removable bollards
